

```
1
2 Dependencies for ALT0
3
4 GPU: NVIDIA GTX1080ti : python2.7 : Matlab(2018a) : pytorch == 1.1.0 : numpy : cv2
5
6
7 Pretrained model for ALT0
8
9 The pretrained model for ALT0 is available in source directory of tracker.
10
11
12 Steps to Run ALT0 on VOT 2019
13
14 1. Download the vot toolkit and trax modules from Github.
15
16 2. Compile the trax module.
17
18 3. Setup the workspace of the toolkit and edit the file tracker_ALT0.m
19    in workspace directory as shown in the file tracker_ALT0.m in tracker's
20    source directory.
21
22 4. Modify the path to the vot_ALT0 in the file tracker_ALT0.m in workspace
23    directory.
24
25 5. Modify the path (self.net_base_path) to the model in the file config.py
26    in ALT0/Tracking/experiments/siamese_fc/
27
28 6. If tracker is ready you should get an EAO of 0.1825.
```
